Has an AG been assigned to this site yet?

Subject: 104E Information Request expected for Bremerton Gasworks in next 30 days

Abby I wanted you to be aware that a 104E Information Request will be sent to the DNR within the next 30 days for the CERCLA Bremerton Gasworks Site. The EPA Site Manager, Eva DeMaria, called to confirm who to send it to (Michal). She noted that it is a 20 page questionnaire and she will be allowing 90 days to respond. This is a legal document with requirements set in law-see example attached above for the Quendall Terminals Superfund Site.

Rolin is aware of this request and has noted that we have already provided a chronological report to EPA regarding leases in the area. Rolin also noted that we have supplemental information already collected and scanned from lease jackets-this will hopefully reduce workload to produce requested information/documents.

As a side note I wanted to provide you the current agreement DNR has in place with EPA to access this site-a Consent for Access Agreement which I have attached above for your review. Let's discuss further when you have a chance.
